# Automated File Transfers Between Go Solutions & Your District

**go SOLUTIONS**

## THE BENEFITS

- More accurate, up-to-date information in GoClaim.
- Fewer errors (misspellings, wrong DOB) when checking student's eligibility.
- Updated student lists for providers to enter on.
- Once the setup is complete, there is no need to send an updated student list each month. The process will be entirely automated.

**1** The district uses Secure File Transfer Protocol (SFTP) to transfer student files to Go Solutions.
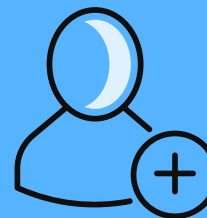

**2** The file that was securely transmitted from the district is processed. This process runs every night.

**3** New students are added and changes to students are updated within the Go Solutions database.

**4** After changes take place, an Output FIle is written. This file records the number of students updated, and students added (along with any errors with the import). The Output File is automatically uploaded into Go Solutions.
