

# Streamline Guardian Consent with Digital Signatures

## Maximize Medicaid Reimbursements With Digital Options for Guardian Consent

We're committed to offering quality solutions to the districts we serve, and our new digital signatures feature is the latest. Streamline operations across departments, keep documents and information secure, and help maximize Medicaid reimbursements with the digital signature functionality in Go Solutions. Send parents or guardians documents to sign electronically using nothing more than their finger and a smart phone or other electronic device. This option lets you capture guardian signatures and the consent is electronically added to the student's profile in GoClaim™. This tool will help your school cut costs and reduce the amount of time you spend processing paperwork.

But digital doesn't stop there! Our GoIDEA™ IEP solution also includes options for capturing digital signatures. For split households, you have the option to send the same form to each household in order to obtain multiple signatures.
